1、Application

The NDC1-1250~2650 series of AC contactors (hereinafter referred to as contactors) have the AC 50Hz (or 60Hz) and the rated insulation voltage of 1000V, and are mainly used for the electric circuit with the rated working voltage of 690V and the rated working current of 1250~2650A as well as the AC-1 utilization category for remotely connecting and breaking the circuit.

5、Working condition

1) Free from acidic, alkaline or other corrosive gases in the ambient air;

2) Temperature:

Storage: -60℃~+80℃;

Operating: -25℃~+40℃;

Maximum allowable temperature at the standard control voltage: -40℃~+70℃^(note1)。

3) Altitude in the installation place is no more than 3,000m (derating is required in case of being above 3,000m);

File Number	NDT500975	Version	1	Implementation Date	20190620
-------------	-----------	---------	---	---------------------	----------

4) The relative air humidity at the installation site should not exceed 95%. Condensing should be avoided in the working environment.

5) High temperature or high altitude environment capacity reduction:

High temperature or high altitude environment capacity reduction, according to the following data reference

(1) Turn the dial switch to ~~PLC~~ B for control of power supply sides A1-A2, and perform control according to the control logic with the control diagram shown below:

(2) PLC control

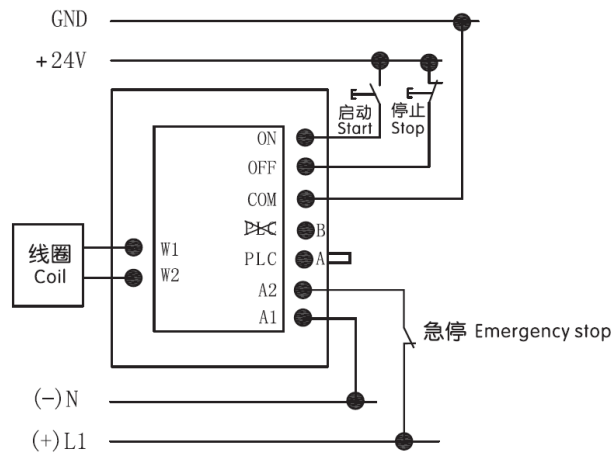

Turn the dial switch to PLC A with ON, OFF, COM connecting with PLC, and perform control according to the control logic with the control diagram shown below:

Note: PLC adopts the relay output type or transistor-source output type.

(3) Control of the active command appliance: Place the dial switch in PLC A with ON, OFF, COM connecting with the command appliance (button), and perform control according to the control logic with the control diagram shown below:

9、Packaging and Storage

Each set of assembled product is packed in a case, which should be stored in a warehouse with the air ventilation and the temperature between -60°C and +80°C. No acidic alkaline or other corrosive gas exists in the ambient air in the warehouse.

10 Accessories and Delivery List

10.1 Accessories

Contactor products are supplied with optional accessories. If accessories are not required, it is not necessary to select them. Currently, NDC1-1250~2650 series products can be installed with the following optional accessories:

Auxiliary contact NF1 series, reed type auxiliary contact F1-11DS/C1, delay auxiliary contact NS1 series.

10.2 Ordering and delivery list

The following information shall be provided during ordering:

A full range of models and specifications, ordering quantity.

For optional accessories, add the accessory specifications before the body model specifications.

Example: NDC1-2100 AC220V 50/60Hz+NF1-22, 10 sets.

The product delivery list contains the following information:

File Number	NDT500975	Version	1	Implementation Date	20190620
-------------	-----------	---------	---	---------------------	----------

NDC1-1250 product:

Product body×1, grounding screws of the main circuit×18sets, rounding screw ×1 set, phase insulated partitions ×4, user manual ×1.

NDC1-1350 product:

Product body×1, grounding screws of the main circuit×12sets, rounding screw ×1 set, phase insulated partitions ×4, user manual ×1.

NDC1-1450(L)~2650 product:

Product body×1, grounding screws of the main circuit×24sets, rounding screw ×1 set, phase insulated partitions ×4, user manual ×1.

If provided with optional accessories, the default accessories will be installed on the contactor body.

Each set of connection bolts of the main circuit includes: bolt (M12) ×1, spring washer ×1, plain washer×1, nut ×1.

Each set of grounding bolts includes: bolt (M12) ×1, plain washer ×1.

11 Precautions

- 1) The installation site of the product should not be shaky or vibrant.
- 2) For vertical installation of the product, the gradient between the installation surface and the horizontal plane is no more than $\pm 5^{\circ}$;
- 3) Reliable cabling is required to prevent the terminals from being burnt out due to abnormal heat at the terminals; therefore, regular maintenance is necessary;
- 4) In the course of use, after a certain number of turn-on and segmentation operations of the silver contact of the contactor, the surface of the silver contact surface will be singed or blackened. This does not affect the use, and it should not be polished.
