1. Applicable Scope and Purpose of Circuit Breaker

The NDM2-800 molded case circuit breaker (hereinafter referred to as circuit breaker) applies to infrequent switching of circuits with the AC 50Hz, the working voltage of AC690V and working current of 800A as well as infrequent motor starting. With the overload, short circuit and undervoltage protection functions, the circuit breaker can protect lines and power equipment from damage.

4. Main Technical Parameters of Circuit Breaker

Table 2 Main Technical Parameters of Circuit Breake	er
---	----

Model	NDM2-800				
Rated current of frame	Inm (A)	800			
Rated current In (A)			6	530, 700, 80	0
Rated insulation voltage	e Ui (AC V)			1000	
Rated impulse withstan	d voltage Uim	p (V)		8000	
Rated working voltage	Ue (AC V)		2	400/415, 69	0
Power frequency withst	and voltage U	(1min) (V)		3500	
Utilization category	А				
Number of poles		3 4			
Breaking capacity level			М	Н	/
Rated limit	AC400/415V		75	100	75
short-circuit breaking capacity Icu (kA)	AC690V		20	/	/
Rated operating	AC400/415V		56.25	75	56.25
short-circuit breaking capacity Ics (kA)	AC690V		15	/	/
	Electrical life		7500		
Operating performance (times)	Mechanical	Maintainable free life		10000	
	life	Maintainable life	20000		

4.1 Selection of the circuit breaker connecting bus or cable cross-section area: Table 3 Selection of the NDM2-800 Circuit Breaker Connecting Bus or Cable Cross-section Area

	Cable	e section	Coppe	r bar size
Rated current (A)	Quantity	Cross-section area (mm ²)	Quantity	Cross-section area (mm ²)
630	2	185	2	40×5
700	2	240	2	50×5
800	2	240	2	50×5

4.2 Tightening Torque of the Circuit Breaker Terminal and Mounting Screw

Table 4 Tightening Torque of the Circuit Breaker Terminal and Mounting Screw

Model	Thread diameter (mm)	Torque (N m)
NDM2-800	M12	28
NDW2-800	M6	6

4.3 Derating factor of temperature change for the circuit breaker Table 5 Derating Factor Table of Temperature Change for the Circuit Breaker

Model	Derating factor of product temperature change							
NDM2-800	Temperature (°C)	40 ℃	45℃	50℃	55℃	60℃	65℃	70℃
INDM2-800	Derating factor	1	0.980	0.960	0.939	0.918	0.897	0.877

Note: 1) When the operating ambient temperature is below $+40^{\circ}$ C, the product can be used normally without

derating capacity.

2) The above derating factors are measured at the frame current.

4.4 High-altitude derating factor of the circuit breaker

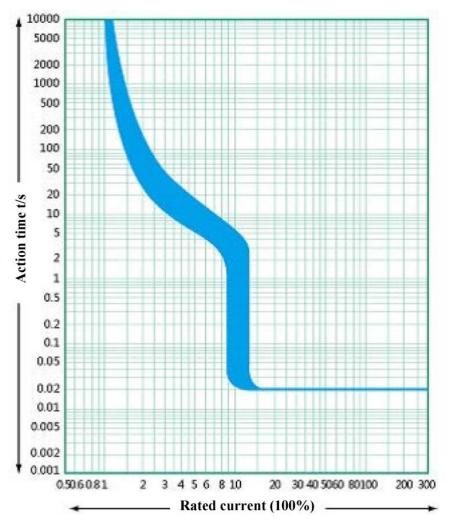

Table 6 High-altitude Derating Factor Table of Circuit Breaker

Elevation (m)	Working current correction coefficient	Maximum working voltage (V)	Power frequency withstand voltage correction coefficient (V)	Isolation voltage correction coefficient (V)
2000	1	690	3500	1000
2500	1	690	3500	1000
3000	0.98	620	3150	900
3500	0.97	580	3000	850
4000	0.95	550	2800	810
4500	0.94	520	2650	770
5000	0.93	500	2500	730

5. Normal Working Environment of Circuit Breaker

- The altitude of the installation site doesn't exceed 2,500m. See the "High-altitude Derating Factor Table of Circuit Breaker" for the derating factor at the altitude;
- 2) The ambient temperature is -35°C ~ + 70°C; the average within 24 h shall not be more than +35°C. If the ambient temperature is higher than +40°C, the user needs to reduce the capacity. See the "Derating Factor Table of Temperature Change for the Circuit Breaker" for the derating factor;
- 3) Its relative humidity at an ambient temperature of +40 °C should not exceed 50%. A higher relative humidity is allowed at a lower temperature. For example, the relative humidity at 20 °C can reach 90%; for frost due to temperature change, the corresponding measures should be taken;
- 4) The product can withstand the effects of wet air, salt mist, oil mist and mould;
- 5) The installation category of the circuit breaker connected to the main loop is: Category III (power distribution and control level), The installation category of the circuit breaker not connected to the main loop is: Category II (load level);
- 6) The pollution level is Level 3;
- The product should be installed in places that are free from explosive media, media corrosive to metal, insulation damaging gas, and conductive dust, which should be also avoided from snow and rain;
- 8) In case of stricter user conditions than the above description, negotiate with the manufacturer.

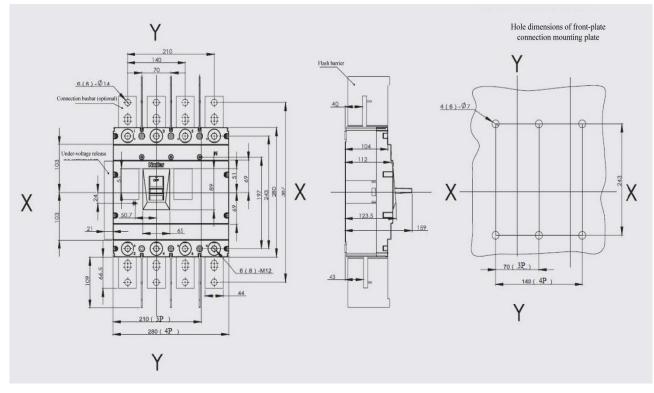

6. Short-circuit Overload Protection Characteristic Curve of Circuit Breaker

Time/Current Characteristic Curve

7. Outline, Mounting Hole Dimensions and Safety Distance of Circuit Breaker

7.1 Outline and mounting hole dimensions of circuit breaker

Note: The limit deviation not indicated with the tolerance dimensions is as per GB/T 1804-c. 7.2 Safe mounting distance of circuit breaker

Table 7 Insulation Distance Mounted in the Metal Cabinet (Unit: mm)

Mounting distance	A (inlet wire end to the cabinet face)		В	С
Model	With a terminal cover	Without a terminal cover	(distance from side to the cabinet face)	(outlet wire end to the cabinet face)
NDM2-800	25	120	35	35

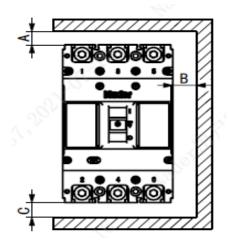

Table 8 Winnihum Center Distance between Rowed Circuit Breakers (Unit. min)					
	Width of c	ircuit breaker	I Center distance		
Model	3 poles	4 poles	3 poles	4 poles	
NDM2-800	210	280	250	320	

Table 8 Minimum Center Distance between Rowed Circuit Breakers (Unit: mm)

Note: Check the connected busbar or cable during rowing or stacking of the circuit breaker to ensure that the air insulation distance won't be reduced.

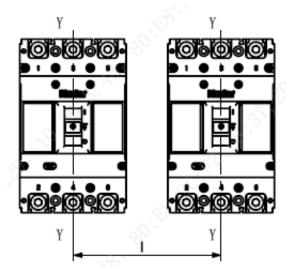

Table 9 Minimum Distance between Stacked Circuit Breakers (Unit: mm)

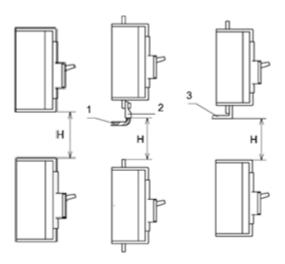

Madal	H (distance of circuit breaker from bottom)		
Model	With a terminal cover	Without a terminal cover	
NDM2-800	155	155	

Note: 1. Bare cable connection

- 2. Cable insulating connection
- 3. Connection without insulation

Requirements: Check whether the terminal cover or phase partition is assembled properly before products are energized.

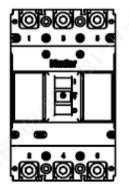

Nader 良信

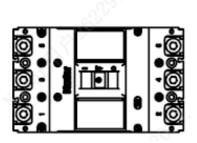

8. Installation Direction of Circuit Breaker

For vertical installation of the product, the gradient between the installation surface and the vertical plane is no more than $\pm 22.5^{\circ}$.

Horizontal installation of the product.

Vertical Installation

Horizontal Installation

9. Packaging and Storage of Circuit Breaker

Minimum packaging quantity: 1 piece/box. The packaged products should be stored in a warehouse with the air ventilation and the relative humidity no more than 80% when the ambient temperature is -40°C~+75 °C. No acidic alkaline or other corrosive gas exists in the ambient air in the warehouse. Under the conditions above, the storage period shall be no more than three years since the manufacturing date.

SN	Name	Specification	3P Quantity/Set	4P Quantity/Set
1	Cross small pan-head screw	M6×95	4	6
2	Hexagon nut	M6	4	6
3	Spring washer	6	4	6
4	Plain washer	6	8	12
5	Plug		6	8
6	Phase partition		4	6

10. Installation Direction of Circuit Breaker

11. Circuit Breaker Notes

- Various characteristics and accessories of the circuit breaker are set in the factory. The circuit breaker, tripping unit or other accessories can only be adjusted, installed and maintained by the trained or qualified professionals according to the parameter requirements of the line design;
- 2) Ensure that the power supply is off before installing or removing any device;
- 3) The circuit breaker handle can be located in three positions, indicating three states: on, off and free tripping. When the handle is in the free tripping position, pull the handle in the off direction when the circuit breaker is connected and on.
