# 1. Applicable Scope and Purpose of Circuit Breaker

The NDM3L-400 circuit breaker with the residual current protection (hereinafter referred to as circuit breaker) applies to the AC 50/60Hz, the working voltage of AC415V and the working current up to 400A for infrequent switching as well as infrequent motor starting. With the overload, short circuit and undervoltage protection functions, the circuit breaker can protect lines and power equipment from damage. Meanwhile, they can deal with the personal safety, fire hazards and other potential risks caused due to long-term ground faults that can't be detected with the overcurrent protection function.

#### 4.2 Tightening Torque of the Circuit Breaker Terminal and Mounting Screw

Table 4 Tightening Torque of the Circuit Breaker Terminal and Mounting Screw

| Model     | Thread diameter (mm) | Torque (N·m) |
|-----------|----------------------|--------------|
| NDM21 400 | M10                  | 20           |
| NDM3L-400 | M6                   | 6            |

#### 4.3 Derating factor of temperature change for the circuit breaker

Table 5 Derating Factor Table of Temperature Change for the Circuit Breaker

| Model      | Derating Factor Table of Product Temperature |    |       |       |       |       |       |       |
|------------|--|----|-------|-------|-------|-------|-------|-------|
| NDM3L-400  | Temperat ure (°C)                            | 40 | 45    | 50    | 55    | 60    | 65    | 70    |
| NDWI3L-400 | Derating factor                              | 1  | 0.981 | 0.962 | 0.942 | 0.922 | 0.901 | 0.879 |

Note: 1). When the operating ambient temperature is below 40°C, the product can be used normally without derating capacity.

# 4.4 High-altitude derating factor of the circuit breaker

Table 6 High-altitude Derating Factor Table of Circuit Breaker

| Elevation (m) | Working current correction coefficient | Power frequency<br>withstand voltage<br>correction coefficient<br>(V) | Isolation voltage correction coefficient (V) |
|---------------|--|---|--|
| 2000          | 1                                      | 3500  | 1000   |
| 2500          | 1                                      | 3500  | 1000   |
| 3000          | 0.98                                   | 3150  | 900  |
| 3500          | 0.97                                   | 3000  | 850  |
| 4000          | 0.95                                   | 2800  | 810  |
| 4500          | 0.94                                   | 2650  | 770  |
| 5000          | 0.93                                   | 2500  | 730  |

Address: No. 2000, South Shenjiang Road, Pudong New Area, Shanghai Post code: 201315 Tel.: (021) 68586699 Fax: (021)23025796

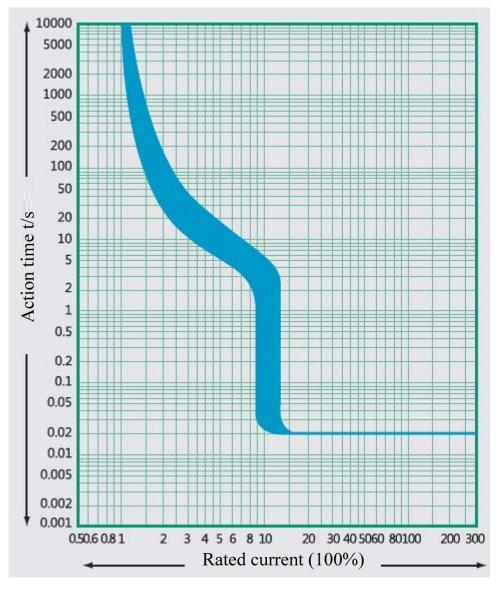

<sup>2).</sup> The above derating factors are measured at the frame current.

# 5. Normal Working Environment of Circuit Breaker

- The altitude of the installation site doesn't exceed 2,500m. See the "High-altitude Derating Factor Table of Circuit Breaker" for the derating factor at the altitude;
- The ambient temperature is  $-35^{\circ}$ C  $\sim +70^{\circ}$ C; the average within 24 h shall not be more than +35°C. If the ambient temperature is higher than +40°C, the user needs to reduce the capacity. See the "Derating Factor Table of Temperature Change for the Circuit Breaker" for the derating factor;
- 3) Its relative humidity at an ambient temperature of  $+40^{\circ}$ C should not exceed 50%. A higher relative humidity is allowed at a lower temperature. For example, the relative humidity at 20°C can reach 90%; for frost due to temperature change, the corresponding measures should be taken;
- The product can withstand the effects of wet air, salt mist, oil mist and mould;
- The installation category of the circuit breaker connected to the main loop is: Category III (power distribution and control level), The installation category of the circuit breaker not connected to the main loop is: Category II (load level);
- The pollution level is Level 3;
- The product should be installed in places that are free from explosive media, media corrosive to metal, insulation damaging gas, and conductive dust, which should be also avoided from snow and rain;
- In case of stricter user conditions than the above description, negotiate with the manufacturer.

# 7. Outline and Mounting Hole Dimensions of Circuit Breaker

#### 7.1 Outline and mounting hole dimensions of circuit breaker

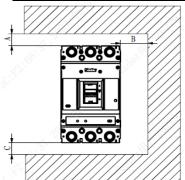

Note: The limit deviation not indicated with the tolerance dimensions is as per GB/T 1804-c.

#### 7.2 Safe mounting distance of circuit breaker

Table 7 Insulation Distance Mounted in the Metal Cabinet (Unit: mm)

| Mounting distance | A (inlet wi           | re end to the et face)   | B (distance from          | C (outlet wire end   |
|-------------------|-----------------------|--------------------------|---------------------------|----------------------|
| Model             | With a terminal cover | Without a terminal cover | side to the cabinet face) | to the cabinet face) |
| NDM3L-400         | 25                    | 120                      | 35                        | 35                   |

Address: No. 2000, South Shenjiang Road, Pudong New Area, Shanghai

Table 8 Minimum Center Distance between Rowed Circuit Breakers (Unit: mm)

| Model     | Width of cir | cuit breaker | I Center distance |         |  |
|-----------|--------------|--------------|-------------------|---------|--|
| iviodei   | 3 poles      | 4 poles      | 3 poles           | 4 poles |  |
| NDM3L-400 | 150          | 198          | 190               | 238     |  |

Note: Check the connected busbar or cable during rowing or stacking of the circuit breaker to ensure that the air insulation distance won't be reduced.

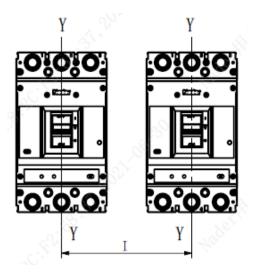

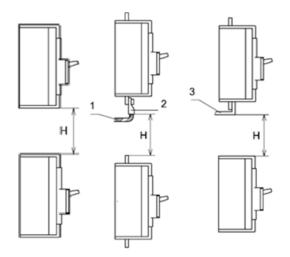

Table 9 Minimum Distance between Stacked Circuit Breakers (Unit: mm)

| Model     | H (distance of circuit breaker from bottom) |                          |  |  |
|-----------|---|--------------------------|--|--|
| Model     | With a terminal cover                       | Without a terminal cover |  |  |
| NDM3L-400 | 155   | 155                      |  |  |

Note: 1) Bare cable connection

- 2) Cable insulating connection
- 3) Connection without insulation

Requirements: Check whether the terminal cover or phase partition is assembled properly before products are energized.

#### 8. Installation Direction of Circuit Breaker

For vertical installation of the product, the gradient between the installation surface and the vertical plane is no more than  $\pm 22.5^{\circ}$ .

Horizontal installation of the product.

Vertical Installation

Horizontal Installation

### 9. Packaging and Storage of Circuit Breaker

Minimum packaging quantity: 1 piece/box. The packaged products should be stored in a warehouse with the air ventilation and the relative humidity no more than 80% when the ambient temperature is  $-40^{\circ}\text{C} \sim +75^{\circ}\text{C}$ . No acidic alkaline or other corrosive gas exists in the ambient air in the warehouse. Under the conditions above, the storage period shall be no more than three years since the manufacturing date.

#### 10. Installation Accessory List of Circuit Breaker

| SN | Name                       | Specification | 3P Quantity/Set | 4P Quantity/Set |
|----|----------------------------|---------------|-----------------|-----------------|
| 1  | Cross small pan-head screw | M6×70         | 4               | 6               |
| 2  | Hexagon nut                | M6            | 4               | 6               |
| 3  | Spring washer              | 6             | 4               | 6               |
| 4  | Plain washer               | 6             | 8               | 12              |
| 5  | Phase partition            |               | 4               | 6               |
| 6  | Plug                       |               | 6               | 8               |

#### 11. Circuit Breaker Notes

Address: No. 2000, South Shenjiang Road, Pudong New Area, Shanghai Post code: 2

- 1) Various characteristics and accessories of the circuit breaker are set in the factory. The circuit breaker, tripping unit or other accessories can only be adjusted, installed and maintained by the trained or qualified professionals according to the parameter requirements of the line design;
- 2) Ensure that the power supply is off before installing or removing any device;
- 3) The circuit breaker handle can be located in three positions, indicating three states: on, off and free tripping. When the handle is in the free tripping position, pull the handle in the off direction when the circuit breaker is connected and on.
